

# CODING FUN!

## WEBSITE BASED PROGRAMS

**Code Studio** at code.org is a great set of easy lessons that go up to as complex as you'd like to get!  
<https://studio.code.org/>

### **Code Monster**

A little more advanced in that it teaches java script, but in an accessible way for young kids.  
<http://www.crunchzilla.com/code-monster>

### **Hacky Hack**

For a little older kids, but use it learn Ruby Programming Language.  
<http://www.hackety.com/>

## APPS

### **LightBot** (*Apple, Droid, Kindle*)

Try an hour of code free and see if this simple coding game works for you 4 to 9 year old. Download the app for \$ <http://lightbot.com/>

### **The Foos** (*Apple, Droid, Kindle*)

Learn the basics of coding and create whole game sequences with silly monsters.

### **Kodable** (*web base, Apple, Droid*)

Move fuzzy balls around the screen with code. Unlock more complex coding as you go.

### **Scratch Jr.** (*Apple, Droid tablet*)

A younger version of the MIT developed Scratch for basic to more advanced coding.

### **Daisy the Dino** (*Apple*)

Very basic commands to move a dinosaur. Requires reading the commands

### **Cargo-Bot** (*Apple*)

Simple to hard challenges of moving cargo boxes around in certain patterns
